

IN THE CLAIMS:

Amend claim 1 to read:

1. (Twice Amended) A toner replenishing container for supplying toner to an image forming apparatus comprising:

a container body for storing toner therein;

a cap member attached to a mouth of the container body, the cap member having a toner outlet port and a shutter member for opening/closing the toner outlet port; and

an indication member removably attachable to the cap member to indicate a kind of toner in the container, even with the toner replenishing container detached from the image forming apparatus.
